## PROJECTS

### Hiring Portal for Managers

Preview - [hirelink-001-site1.atempurl.com](https://hirelink-001-site1.atempurl.com)  
Hiring Portal is a web portal that helps hiring managers track candidates, schedule interviews, and manage the hiring process. I was responsible for developing the back-end business logic and designing the front-end user interface of the web portal. I learned how to use .NET Core MVC to create RESTful API, Tailwind CSS to create responsive and modern web pages, and SQL Server as database.

### Triboon: Project Management Solution

Preview - [triboon.web.app](https://triboon.web.app)  
Web application enabling seamless teamwork and project oversight. Empower your organization with intuitive tools for task allocation, real-time updates, and progress tracking. Its responsive design, powered by ReactJS, Tailwind CSS, Firebase, and Firestore, ensures accessibility across devices, enhancing user engagement and productivity.

### Covid Vaccination and Pharma Store Platform

Preview - [projectc19.000webhostapp.com](https://projectc19.000webhostapp.com)  
A dynamic web solution replica of COVID vaccination services and a comprehensive pharmacy store. Seamlessly managed via a custom admin panel. With Offering real-time vaccination updates, product bookings, and streamlined sign-ups. HTML, Bootstrap, Covid API and Javascript as been used.

## PERSONAL WORKS

Worked as a freelance graphic designer for local startups and vendors in which I have designed various logos, business cards, brochures, billboards, and flyers which has led to increasing in revenue for them.
