EDUCATION

Masters in Computer Applications

PES UNIVERSITY | 2022 - 2023

Specialization in Web Technologies. Aggregate of 8.2 CGPA

Bachelors in Computer Applications

VIVEKANANDA INSTITUTE OF MANAGEMENT | 2018 - 2021

Aggregate of 8.2 CGPA

PROFESSIONAL EXPERIENCE

Software Developer

DIMENSION64, BENGALURU | AUG 2023 - PRESENT

Actively contributing to the development of innovative software solutions at Dimension64, a dynamic tech company. Collaborating with cross-functional teams to deliver high-quality and impactful projects.

Intern, Software Development

EXL SERVICE | FEB 2023 - AUG 2023

As an intern at EXL Service, I played a key role in developing the Hiring Portal, a web application aimed at streamlining the hiring process. My responsibilities encompassed implementing back-end business logic using .NET Core MVC, crafting a user-friendly and responsive front-end with Tailwind CSS. This internship provided hands-on experience in full-stack development, setting a solid foundation for my future in web dev.

PROJECTS WITHIN PROFESSIONAL EXPERIENCE

Bundee: Transforming Local Transportation

Live site - www.mybundee.com

I played a key role in developing Bundee, a platform built with React, Next.js, TypeScript, and Tailwind CSS. Bundee offers a unique experience, connecting users with a diverse range of local vehicles for their dream destinations. My contributions ensured a seamless and visually appealing interface for users to explore and enjoy the bundee experience.

Third Eye: Empowering Educational Platform

Preview - <https://thirdeye-website.vercel.app/>

Led pivotal role in Frontend Development for Third Eye, actively shaping the user interface and experience to enhance the educational platform's functionality and visual appeal. Contributed to the creation of a streamlined and engaging interface for management and students.

Analytical problem-solving

Continuous learning commitment

Wire-framing & prototyping

Effective teamwork & communication

Adobe Creative Suite proficiency

(Photoshop, Illustrator, XD)

SOFTWARES

Git, GitHub, GitLab

Atlassian Jira

Vercel, Appwrite

Figma, Webflow

Photoshop, Adobe Illustrator

Visual Studio Code

PERSONAL PROJECTS

RapidLogr: Logs Exploration Tool

Live site - <https://rapidlogr.vercel.app/>

Developed RapidLogr, a dynamic application created as part of Dyte Inc.'s front-end challenge. This tool empowers users to effortlessly uncover insights, troubleshoot issues, and navigate logs with key features such as robust log search, severity filtering, and date range analysis. The application boasts a user-friendly interface, adaptive light and dark modes, and seamless functionality on various devices. Leveraged Next.js and Tailwind CSS for a powerful front-end, resulting in a sleek and modern design.

Triboon: Project Management Solution

Live site - <https://triboon.web.app/>

Developed a responsive web application for streamlined teamwork and project oversight. This final year project demonstrates proficiency in modern web technologies and effective project management solutions. Empowered with ReactJS, Tailwind CSS, Firebase, and Firestore, Triboon offers intuitive tools for task allocation and real-time updates, enhancing user engagement and productivity.

Covid Vaccination and Pharma Store Platform

Github - <https://github.com/othegagan/project-c19>

Developed a dynamic web solution replicating COVID vaccination services and a comprehensive pharmacy store. Seamlessly managed through a custom admin panel, the platform provides real-time vaccination updates, product bookings, and streamlined sign-ups. Utilized HTML, Bootstrap, Covid API, and JavaScript to create a user-friendly and efficient interface.

PERSONAL WORKS & VOLUNTEER EXPERIENCE

Worked as a **freelance graphic designer** for local startups and vendors, by crafting impactful logos, business cards, brochures, billboards, and flyers. Which intern boosting revenue for clients through visually compelling design solutions.

Volunteered at a local government school, assembling computers from donated components to facilitate basic computer education for underprivileged students. Enhancing the learning experience for economically challenged school children, contributing to their fundamental computer knowledge.

HOBBIES

Learning Computer science advancements

Watching sci-fi movies

Food exploration
