PROJECTS

Triboon: Project Management Solution

Preview - triboon.web.app

Web application enabling seamless teamwork and project oversight. Empower your organization with intuitive tools for task allocation, real-time updates, and progress tracking. Its responsive design, powered by ReactJS, Tailwind CSS, Firebase, and Firestore, ensures accessibility across devices, enhancing user engagement and productivity.

Hiring Portal for Managers

Preview - hirelink-001-site1.atempurl.com

Hiring Portal is a web portal that helps hiring managers track candidates, schedule interviews, and manage the hiring process. I was responsible for developing the back-end business logic and designing the front-end user interface of the web portal. I learned how to use .NET Core MVC to create RESTful API, Tailwind CSS to create responsive and modern web pages, and SQL Server as database.

Covid Vaccination and Pharma Store Platform

Preview - projectc19.000webhostapp.com

A dynamic web solution replica of COVID vaccination services and a comprehensive pharmacy store. Seamlessly managed via a custom admin panel. With Offering real-time vaccination updates, product bookings, and streamlined sign-ups. HTML, Bootstrap, Covid API and Javascript as been used.

PERSONAL WORKS

Worked as a freelance graphic designer for local startups and vendors in which I have designed various logos, business cards, brochures, billboards, and flyers which has led to increasing in revenue for them.
